DETAILED ACTION***Election/Restrictions***

Applicant's election of claims 1-7, filed 19-APR-2004, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 8-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claim grouping, there being no allowable generic or linking claim. Election was made without traverse in the papers filed 19-APR-2004.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7, respectively, of U. S. Patent No. 6,406,285. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

In general, claim 1 of U. S. Patent No. 6,406,285 is not identical, but only minor differences in terminology occur. For example: the term "aligned" (li. 4) is now presented as - designed -; the term "oriented" (li. 7) is now presented as - positioned -.

These variations in terminology are essentially are matters of degree and the instant terms are generally broader than the terms of claim 1 of U. S. Patent No. 6,406,285 and effectively read on the terms since a species anticipates a genus.

Art Unit: 1732

Furthermore, the limitation of "a plurality of cooling roll supports.." is not present in the instant claims. However, the limitation is inherent in the instant claim because some form of roll support is required,

Claims 2-6 of U. S. Patent No. 6,406,285 are substantially identical to instant claims 2-6.
